

Block Camera User's Manual

Version 1.0.1

Welcome

Thank you for purchasing our block camera!

This user's manual is designed to be a reference tool for your system.

Please read the following safeguard and warnings carefully before you use this series product!

Please keep this user's manual well for future reference!

Important Safeguards and Warnings

1 . Electrical safety

- All installation and operation here should conform to your local electrical safety codes.
- We assume no liability or responsibility for all the fires or electrical shock caused by improper handling or installation.
- We are not liable for any problems caused by unauthorized modification or attempted repair.

2 . Transportation Security

- No heavy stress, violent vibration or water splash are allowed during transportation, storage and installation.
- Please use the original packing material (or the material of the same quality) when you ship it back to the manufacturer.

3 . Installation

- Do not apply power to the product before completing installation.
- Do not put object on the product.

4 . Environment

- This series product should be installed in a cool, dry place away from direct sunlight, inflammable, explosive substances and etc.
- Please keep it away from the electromagnetic radiation object and environment.
- Please keep the sound ventilation.
- Do not allow the water and other liquid falling into the device.
- Please make sure the CCD (CMOS) component is out of the radiation of the laser beam device. Otherwise it may result in CCD (CMOS) optical component damage.

5. Daily Maintenance

- Current series product has no power button. Please unplug all corresponding power cables before your begin installation or daily maintenance work.
- Please keep the dustproof cap back to protect the CCD or CMOS part if the device does not work for a long time.
- Do not touch CCD (CMOS) component. You can use the blower to clean the dust on the surface of the device. You can use the dry cloth with some alcohol or mild detergent to clear if necessary.
- Do not use the volatility solvent such as the benzene or thinner, or detergent with strong abrasibility. It may result in lens damage or it may adversely affect the device performance.
- If there is too much dust, please use the water to dilute the mild detergent first and then use it to clean the device. Finally use the dry cloth to clean the device

6. About Accessories

Always use all the accessories recommended by manufacturer.

Before installation, please open the package and check that all the components are included in the package:

Contact you local retailer ASAP if something is missing in your package.

1 General Introduction

1.1 Overview

This series camera integrates the traditional camera and network video technology. It adopts audio/video data collection, transmission, and storage together.

This series network camera uses standard H.264 video compression technology, PCM, G.711a/u audio compression technology and etc. It supports bidirectional talk, digital water mark and etc.

This series network camera is widely used in many environments such as office, bank, road monitor and etc.

1.2 Features

User Management	<ul style="list-style-type: none">● Different user rights for each group, one user belongs to one group.● The user right can not exceed the group right.
Data Transmission	<ul style="list-style-type: none">● Support Ethernet transmission.● Support RS485 control function.● Support BNC analog video transmission.
Storage Function	<ul style="list-style-type: none">● Support local storage and Micro SD card storage.● Support centralized storage.
Alarm Function	<ul style="list-style-type: none">● Support real-time video detect, internal abnormality detect, external alarm.● Alarm can activate snapshot, record, alarm output, email and etc.
Network Management	<ul style="list-style-type: none">● Realize device configuration and management via Ethernet.● Support device management via web.● Support various network protocols.
Peripheral Equipment	<ul style="list-style-type: none">● Support peripheral equipment control via the RS485 port.
Power	<ul style="list-style-type: none">● Support DC 12V/AC 24V /PoE power supply.

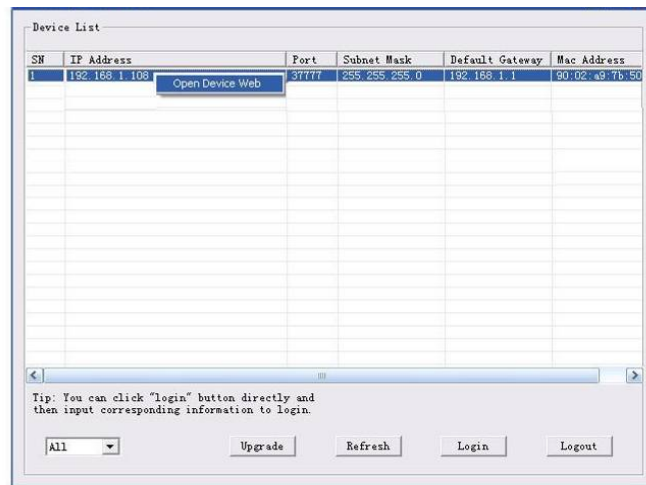

Figure 2-2

Select the “Open Device Web” item; you can go to the corresponding web login interface. See Figure 2-3.

Figure 2-3

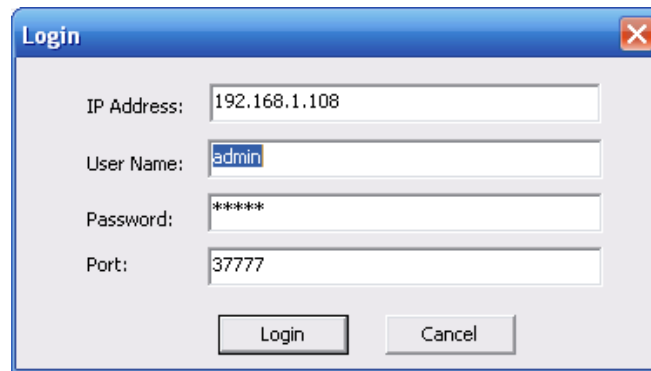

If you want to modify the device IP address without logging in the device web interface, you can go to the configuration tool main interface to set.

In the configuration tool search interface (Figure 2-1), please select a device IP address and then double click it to open the login interface. Or you can select an IP address and then click the Login button to go to the login interface. See Figure 2-4.

In Figure 2-4, you can view device IP address, user name, password and port. Please modify the corresponding information to login.

Please note the port information here shall be identical with the port value you set in TCP port in Web Network interface. Otherwise, you can not login the device.

If you are using device background upgrade port 3800 to login, other setups are all invalid.

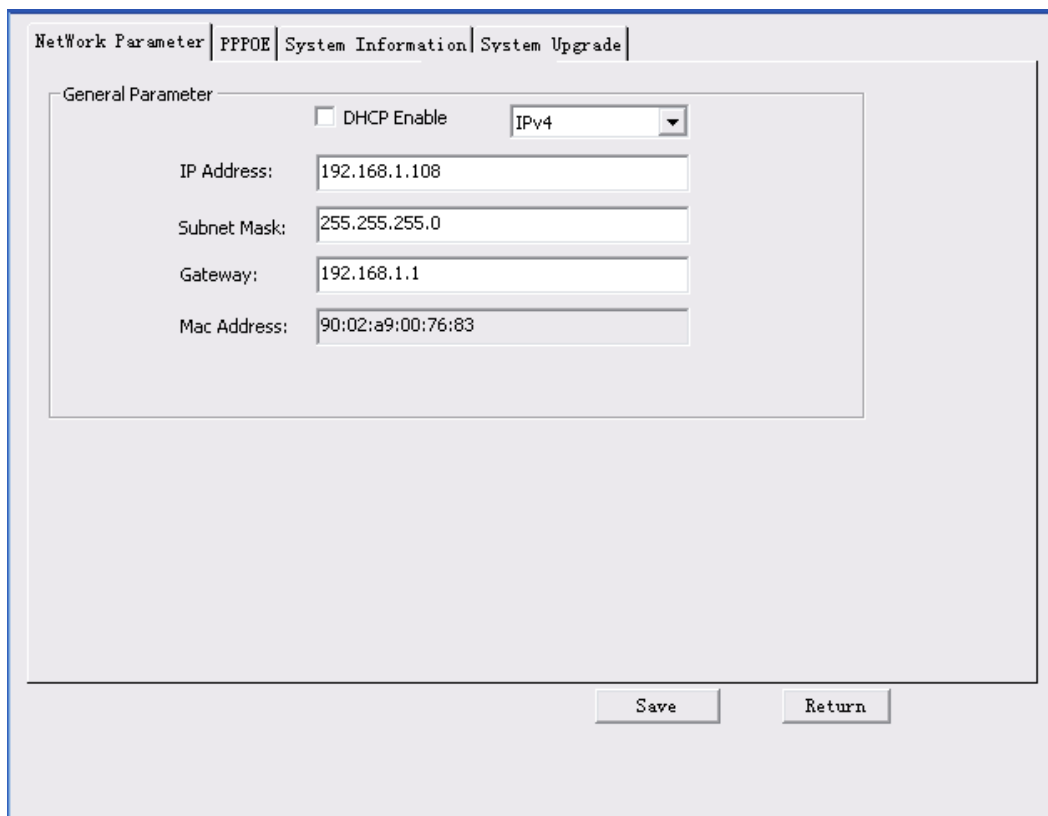

A Windows-style login dialog box titled "Login" with a close button (X) in the top right corner. It contains four text input fields: "IP Address" with the value "192.168.1.108", "User Name" with the value "admin", "Password" with the value "*****", and "Port" with the value "37777". At the bottom, there are two buttons: "Login" and "Cancel".

IP Address:	192.168.1.108
User Name:	admin
Password:	*****
Port:	37777

Login Cancel

Figure 2-4

After you logged in, the configuration tool main interface is shown as below. See Figure 2-5.

The main interface of the configuration tool. It has a tabbed menu at the top with four tabs: "Network Parameter", "PPPOE", "System Information", and "System Upgrade". The "Network Parameter" tab is selected. Below the tabs is a "General Parameter" section. It includes a checkbox for "DHCP Enable" which is unchecked, and a dropdown menu for "IPv4" which is selected. Below these are four text input fields: "IP Address" (192.168.1.108), "Subnet Mask" (255.255.255.0), "Gateway" (192.168.1.1), and "Mac Address" (90:02:a9:00:76:83). At the bottom right, there are two buttons: "Save" and "Return".

Network Parameter | PPPOE | System Information | System Upgrade

General Parameter

☐ DHCP Enable IPv4

IP Address: 192.168.1.108

Subnet Mask: 255.255.255.0

Gateway: 192.168.1.1

Mac Address: 90:02:a9:00:76:83

Save Return

Figure 2-5

For detailed information and operation instruction of the quick configuration tool, please refer to the *Quick Configuration Tool User's Manual* included in the resources CD.

3 Web Operation

These series block camera products support the Web access and management via PC. Web includes six modules: encode setup bar, window adjust bar, system menu bar, window function option bar, PTZ control bar, PTZ setup/menu.

3.1 Network Connection

Please follow the steps listed below for network connection.

- Make sure the block camera has connected to the network properly.
- Please set the IP address, subnet mask and gateway of the PC and the block camera respectively. (Please set the same segment for the device and PC if there is no router. Please set gateway and subnet mask if there is a router in the network.).Device default IP address is 192.168.1.108.
- Use order ping `***.***.***.***(* block camera address)` to check connection is OK or not.

3.2 Login and Logout

Open IE and input block camera address in the address bar.

For example, if your camera IP is 192.168.1.108, then please input `http:// 192.168.1.108` in IE address bar. See Figure 3-1.

Figure 3-1

The login interface is shown as below. See Figure 3-2.

Please input your user name and password.

Default factory name is admin and password is admin.

Note: For security reasons, please modify your password after you first login.

Figure 3-2

If it is your first time to login in, system pops up warning information to ask you whether install control webrec.cab or not after you logged in for one minute. Please click OK button, system can automatically install the control. When system is upgrading, it can overwrite the previous Web too.

If you can't download the ActiveX file, please check whether you have installed the plug-in to disable the control download. Or you can lower the IE security level. See Figure 3-3.

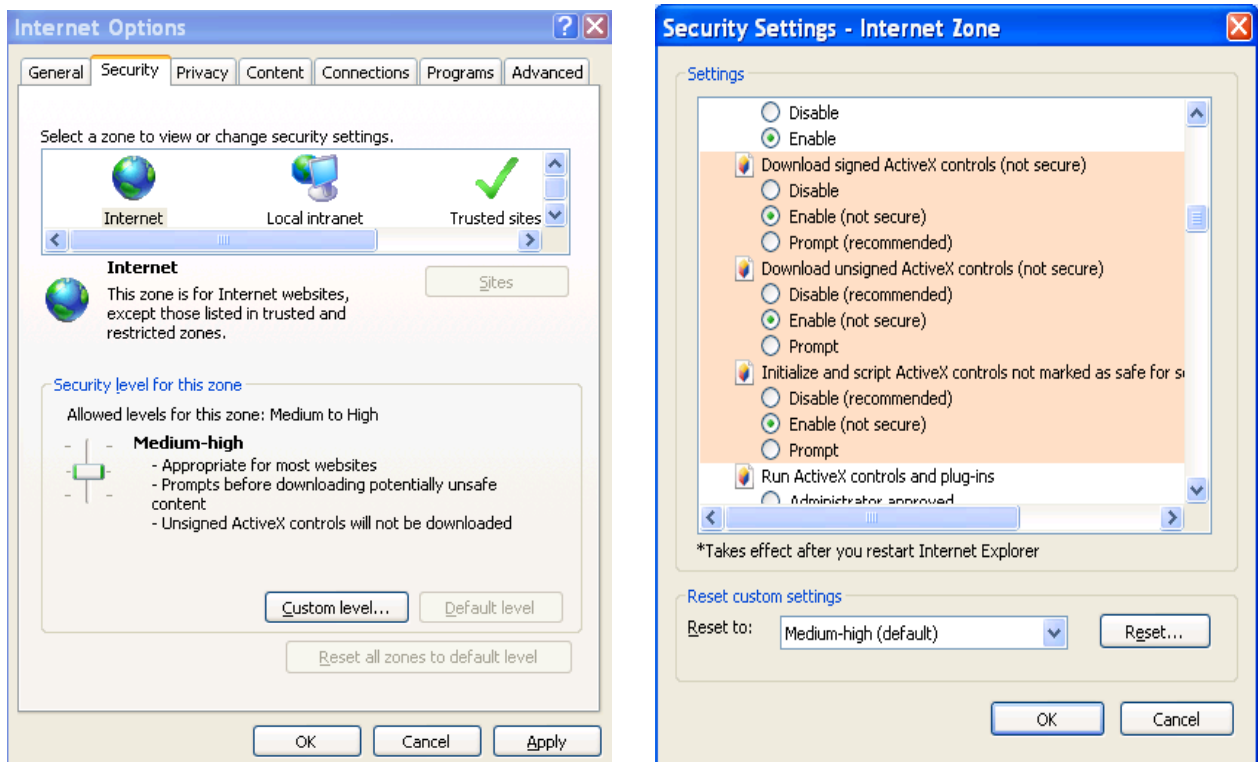

Figure 3-3

After you logged in, you can see the main window. See Figure 3-4.

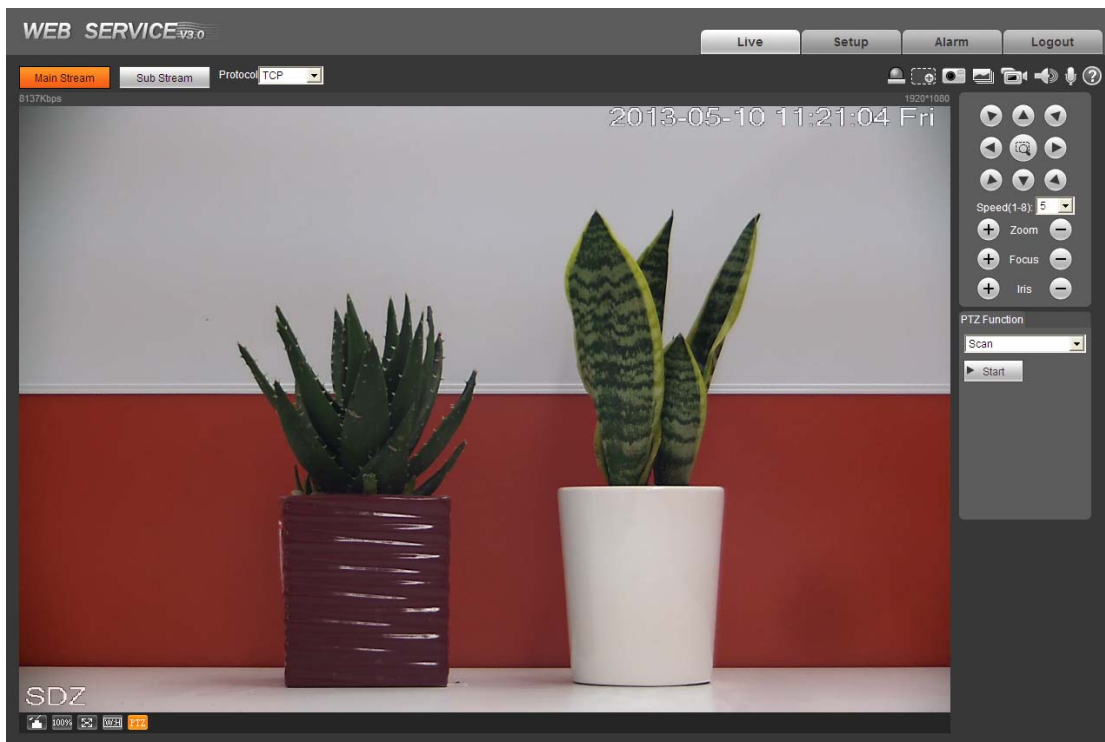

Figure 3-4

Please refer to the Web Operation Manual included in the resource CD for detailed operation instruction.

4 FAQ

Bug	
I can not boot up the device or can not control the device.	Please click RESET button for at least five seconds to restore factory default setup.
Audio function	Please use active device for the audio monitor input, otherwise there is no audio in the client-end.
SD card hot swap	Before draw out SD card, please stop record or snapshot first and then wait for at least 15 seconds to remove the SD card. All the operations before is to maintain data integrity. Otherwise you can lose all the data in the SD card!
SD card write times	Do not set the SD card as the storage media to storage the schedule record file. It may damage the SD card duration.
I can not use the disk as the storage media.	When disk information is shown as hibernation or capacity is 0, please format it first (Via Web).
